

Your Microdermabrasion treatment at Suffolk Medical & Beauty Clinic is tailor made to give you the ultimate results, by combining the Skin Base system and Dermalogica facial products.

This treatment cares for your skin with professional **dermalogica**® products tailored to your skins needs and are also available for you to use at home too!

Your skin firstly will be skin mapped and deeply cleansed prior to the use of the Skin Base system and then we can concentrate on the skins rejuvenation, with the use of Aluminium Oxide crystals to exfoliate and retexturise.

The crystals used are ideal to penetrate the skin and treat all areas of the face, using different pressure settings that are adjusted to your skin's needs. The gentle removal of dead skin cells leaves your skin feeling instantly smoother and fresher, whilst promoting new skin growth, cell renewal, improving underlying muscle tone, and encouraging elastin and collagen growth.

The vacuum action stimulates the circulation and promotes increased blood flow to the area. This carries vital nutrients and energy to the area, such as oxygen, glucose and other minerals essential for your skins health, maintenance and growth.

Your skin is now in the ideal condition to allow the penetration of professional additives and serums. You will enjoy a luxury 20 minute Multivitamin Masque massaged into your face, neck and décolleté to bring out radiance, cell renewal and give you a boost of high concentrates of Vitamins A,C,E and F! The ideal moisturiser and eye cream will be selected to complete your treatment. Your skin therapist will be able to advise you on which course of treatment would be ideally suited to your skins needs. This varies from weekly, to once every 4 - 6 weeks, depending on your needs and the results you are aiming for. Generally clients will opt for a course of 6 treatments 1 - 2 weeks apart to get the maximum effect.

After completing the course, 1 facial every 4 - 6 weeks will maintain the skins health.

Benefits:

- Visible results immediately.
- Healthy, radiant skin, no down time.
- Painless.
- Treats Pigmentation, Acne Scarring, Congested Skins, Open Pores, Dry, Dull and Dehydrated skin.
