

Prices

Medium depth medical peels
for facial resurfacing and
skin brightening

TCA peel £275 (1 area)
£345 (2 areas)

Post peel home care
Sunscreen £28.50

Post treatment recovery cream
£40.00

TCA peels give very good results
after just one application, but in
some cases 3 to 4 treatments may
prove necessary.

Please note that BRA® chemical
peels must only be applied under
medical supervision.

Star ingredients

- **TCA (trichloroacetic acid):** up to 30% TCA.
- **L-ascorbic acid:** at a concentration of 10%, stimulates the synthesis of collagen.
- **Phytic acid, ROS Modulator System (Reactive Oxygen Species):** protects from oxidative stress, avoids pigment recurrence
- Auriga BRA® up to 30% TCA medical chemical peel is a treatment for application only under medical supervision.

Medical Chemical Peels

01787 211000

Our skin is severely tested on a daily basis and losing its youth and its beauty.

Dull colour, loss of glow, skin loosening, fine lines and wrinkles, pigmentation and imperfections are all symptoms that appear with age.

The Auriga TCA chemical peel is the ideal solution to restore youthfulness and luminosity to your skin.

A facial peel works by eliminating the dead cells of the epidermis, stimulating cell repair and renewal in order to encourage new skin growth.

The peel will cause desquamation which may be very light, but may also go as far as brown scabs, depending on the concentration of the active principle used.

The depth of action is controlled by the doctor/nurse according to the type of skin to be treated and the desired result.

The TCA journey

Pre peel

Post peel—Day 10

During application of the peel

The peeling process— Day 4

Indications

- Softens fine lines and wrinkles
- Reduces sun spots and pigment imperfections of the face
- Tightens facial pores
- Helps the skin regain its youthfulness and beauty
- Brightens and evens out the skin tone
- Improves suppleness and elasticity of the skin
- Resurfaces and softens the surface layers of the skin
